

Rubbish washing up at KAUST

Each day coastline patrols the beach collecting rubbish
that has washed up on the KAUST shoreline.
On average 3 or 4 large plastic bags are collected each day.

1 DAY =

1 YEAR = 1248 bags

Most of the rubbish is plastic and most of the plastic is bottles.
When the plastic deteriorates it breaks up and can become part of the food chain.
Animals are injured when they mistake the plastic for food.

Take Action

Be careful not to drop plastic into the sea.
As you walk along the beach collect rubbish and put it in the bins.
Help our waters stay full of life not plastic.
